DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a filter column and a kit comprising a filter column, a least one collection tube, a binding buffer, a washing solution, and an elution buffer, classified in class 422, subclass 59+.
 - II. Claims 24-25, drawn to method for isolating a nucleic acid material, classified in class 536, subclass 127.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case nucleic acid material may be isolated using a different filter column, such as the spin filter column disclosed by Ha-Ahmad US 6,177,278 B1 (column 3, lines 25-55).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
